About Me

Hello! I am Soe Paing, 23 years old.

I changed my career from hotel life to web developer life.

I have some experience in UI/UX design and front-end development with Team Work.

Now I am studying web development to become my main career and trying to be an Employee of development company.

I love to create responsive and perfect UI designs in a good condition of user experience (UX).

My upcoming plan is to become a fullstack-developer.
